

IDEAS

- generic 5V I/O port (rather than 3.3V SPARE3) to facilitate machine integration.
- use ENIG gold finish on front panel for graphical element
- evaluate protection if both USB and external power are active.

CHANGELOG

- Rev1.1 : fixed R11 connection between FB and GND
- Rev1.1 : fixed footprint of RFID chip (pins description in reverse order)
- Rev1.1 : moved buzzer to top side
- Rev1.1 : fixed wrong footprint of Q1
